Computation for Design and Optimization. The Computation for Design and Optimization (CDO) program offers a master's degree to students interested in the analysis and application of computational approaches to designing and operating engineered systems. The curriculum is designed with a common core serving all engineering disciplines and an elective component focusing on specific applications.

Batteries are devices that convert chemical energy into electrical energy. When two different metals are connected by an electrolyte, a chemical reaction occurs at each metal surface, called electrodes, that either releases or uses electrons. When these electrodes are connected by a wire, electrons will move from one surface to the other, creating an electric current.

Graduate Scholarships. While less common than undergraduate scholarships, scholarships for graduate students are available. Graduate students rely heavily on fellowships or assistantships - especially in high-need areas like nursing or teaching - but these aren't available to everyone and don't always cover a graduate student's living expenses.
