Laboratory and Chemical Safety - University of Florida

The Laboratory Safety and Chemical Hygiene Plan (CHP) is a written program for ensuring the safe use of chemicals in laboratories at Indiana University.

Laboratory Safety and Chemical Hygiene Plan: Laboratory

Occupational hygiene (United States: industrial hygiene (IH)) is the anticipation, recognition, evaluation, control, and confirmation of protection from hazards at work that may result in injury, illness, or affect the well being of workers. These hazards or stressors are typically divided into the categories biological, chemical, physical, ergonomic and psychosocial.

The term and its associated symbol are generally used as a warning, so that those potentially exposed to the substances will know to take precautions. The biohazard symbol was developed in 1966 by Charles Baldwin, an environmental-health engineer working for the Dow Chemical Company on the containment products.. It is used in the labeling of biological materials that carry a significant health ...

Biological hazard - Wikipedia

Flammable materials can be found as solids, liquids, or gases. Flammable solids can be classified in three categories: desensitized explosives, self-reactive materials, and readily combustible solids. These are generally non-explosive but may ignite when exposed to friction, moisture, heat retained from processing, or a spontaneous chemical change.
