Modern food biotechnology, human health and development

The Food Science and Biotechnology (Food Sci. Biotechnol.; FSB) which was launched in 1992 as the Food Biotechnology and changed to the present name in 1998. It is an international peer-reviewed journal published bimonthly by the Korean Society of Food Science and Technology (KoSFoST).

Food Science and Biotechnology - springer.com

Biotechnology (commonly abbreviated as biotech) is the broad area of biology involving living systems and organisms to develop or make products, or "any technological application that uses biological systems, living organisms, or derivatives thereof, to make or modify products or processes for specific use" (UN Convention on Biological Diversity, Art. 2).

Biotechnology - Wikipedia

Agricultural biotechnology has been a source of both public controversy and technological achievement. One major recent controversy was the discovery in taco shells of StarLink[®] corn, a genetically engineered corn variety which was approved for animal feed use but not direct human consumption.
